JONATHAN SANSÓ

Full-Stack Developer | React/Next.js, Node.js/NestJS | Multi-tenant SaaS (Supabase/Postgres RLS)
Buenos Aires, Argentina | +54 9 11 6912-3268 | jonasans2@live.com.ar | English B2
Portfolio | GitHub | LinkedIn

SUMMARY

Full-Stack Developer with 3+ years building multi-tenant SaaS products end-to-end. Core expertise in tenant isolation (Supabase RLS/Policies), POS/orders lifecycle, RBAC, AI document intelligence (OCR/NLP/STT), and security-first architecture (MFA, CSRF, HMAC/JWT). Daily stack: Next.js, React, TypeScript, Tailwind, Supabase/PostgreSQL, NestJS, Prisma. Experienced with Docker, NGINX, AWS, Terraform, and Python (FastAPI, Pandas). Mercado Pago API integration.

TECHNICAL SKILLS

Frontend: Next.js, React, TypeScript, Tailwind CSS, HTML5, CSS3, JavaScript, Zustand, TanStack Query, Zod, react-hook-form, @dnd-kit, ShadCN UI
Backend: NestJS, Node.js, Prisma, FastAPI (Python), Express, GraphQL
Databases: PostgreSQL (Supabase RLS, Triggers, RPC, Indexes), MySQL, MariaDB, MongoDB, SQL Server
DevOps & Infra: Docker, NGINX, Debian/Linux, AWS (EC2, RDS, S3, CloudFront), Terraform, Vercel, Git/GitHub
AI & Data: Tesseract OCR, NLP, Speech-to-Text, Pandas, jsPDF, ExcelJS
Security: Auth0, MFA/2FA, CSRF, Helmet/CORS, HMAC-SHA256, JWT, Rate Limiting, Input Sanitization

PROFESSIONAL EXPERIENCE

Ocean Stack - *Full-Stack Developer (Multi-tenant SaaS)* - Dec 2025 - Present
Products: Niappa POS | Oceans HR (ATS)

- Shipped weekly product increments in a structured delivery loop: Figma as source of truth, daily alignment with CTO + PM, iterative releases, and UX/UI polishing (Next.js, TypeScript, Tailwind).
- Implemented tenant-safe isolation and role-based permissions across modules so each business only sees and mutates its own data (Supabase Postgres, RLS/Policies).
- Delivered operational back-office flows (products, ingredients, stock, counts, suppliers) with strong data consistency guarantees via DB automation (Postgres triggers, indexes, SQL/RPC).
- Implemented orders at scale: table sessions + split checks, resilient order lifecycle, and safe edit/void/restore flows keeping stock accurate end-to-end (RPC, transactional integrity, idempotent stock adjustments).
- Built reporting exports for operations: PDF/Excel (sales + cash/audit), plus productivity-focused UI improvements (i18n ES/EN, search, sorting, confirmations).
- Built Oceans HR ATS module: Kanban pipeline with drag-and-drop, vacancy management, candidate profiles with notes/comments, recruitment funnel reports, RBAC with company-level roles, full ES/EN i18n (Next.js 16, React 19, TanStack Query v5, Zod v4, @dnd-kit, Supabase RLS).

Argentine Federal Penitentiary Service — *Full-Stack Developer / AI Engineering* - Jan 2024 — Present
Private repos

- Led delivery of a two-platform ecosystem (internal ops + public verification portal) with secure data flows and controlled access for multiple stakeholders (React, Next.js, TypeScript, Tailwind, NestJS, Prisma).
- Built an AI-assisted document intelligence pipeline: extract and summarize from scans/images/audio with human-in-the-loop review (Python, FastAPI, Tesseract OCR, NLP, Speech-to-Text).
- Automated operational reporting (PDF/Excel/Word) with charts, filters, and standardized formatting replacing manual workflows (TypeScript, Pandas).
- Engineered secure document verification: time-limited access, cryptographic validation, anti-exfiltration controls (HMAC-SHA256, JWT, watermarking).
- Implemented end-to-end security (MFA, CSRF, input sanitization, rate limiting, Helmet/CORS) and delivered containerized infrastructure with reverse proxying and automated backups (Docker, NGINX, Debian).
- Built secure integration layer: signed requests, idempotency, clock-skew validation, file integrity checks (SHA-256).
- Leveraged Redis for async job queues (audit logging, cross-service publishing, scheduled sync) with BullMQ, plus server-side caching with automatic in-memory fallback for zero-downtime resilience.

VirtuaState — *Frontend Developer* - May 2022 — Dec 2023

- Built a responsive marketing/portfolio site for a VR/AR studio with SEO and performance optimizations (HTML5, CSS3, JavaScript, mobile-first). Live: virtuastate.net

EDUCATION

Higher Degree in Programming - Teclab - Aug 2022 - Aug 2024

- Software fundamentals and delivery practices: databases, web development, UX, cloud basics, project management.

Full-Stack Web Development - CoderHouse - Jan 2022 — Mar 2023

- Delivered multiple end-to-end projects: frontend and backend foundations, web app architecture (HTML5, EJS, CSS/SASS, React, Node.js, MongoDB, Express, GraphQL). Live project
