SUMMARY

Solutions Engineer / Full-Stack Developer with 4 years combining **development, infrastructure and automation** to deliver end-to-end solutions. Deep hands-on **AWS** (EC2, RDS, S3, CloudFront) + **Terraform** (IaC) + **GitHub Actions** (CI/CD), which transfers directly to **Azure** (hands-on: dockerized Next.js + MySQL app deployed on Azure) and to **PowerShell** (used daily for Windows/Debian workflow automation, in addition to Python/Bash). Owns **requirements discovery**: at the Federal Penitentiary Service I am the one who surveys staff needs and identifies which manual workflows are worth automating with AI, then ships the solution. Daily stack: **Next.js, React, TypeScript, NestJS, Python** (FastAPI), **Docker, Gemini API/LLM**.

Core Competencies: Solutions Engineering | Requirements Discovery / Stakeholder Relevamiento | Full-Stack Development | AI/LLM Integration | AWS | Azure (hands-on) | Terraform | GitHub Actions / CI/CD | PowerShell | Python | Bash | Docker | Multi-tenant SaaS | REST APIs | Legacy DB Migration | RBAC / Row-Level Security | Microservices | CI/CD | Agile / Scrum

TECHNICAL SKILLS

Cloud & IaC: AWS (EC2, RDS, S3, CloudFront), **Terraform** (IaC), **Azure** (hands-on: Docker app + MySQL deploy, public reports portal), Vercel
Automation & Scripting: **Python, Bash** (Linux/Debian), **PowerShell** (Windows/Debian file transfer & workflow automation), **GitHub Actions, CI/CD**

Frontend: Next.js, React, TypeScript, JavaScript (ES6+), Tailwind CSS, Zustand, TanStack Query, Zod, react-hook-form, @dnd-kit

Backend: NestJS, Node.js, Prisma, FastAPI (Python), Express, REST APIs, OpenAPI/Swagger, Microservices

Databases: PostgreSQL (Supabase RLS/Triggers/RPC), MySQL, MariaDB, MongoDB, SQL Server, iBase (legacy migration)

AI & Data: Gemini API (LLM scoring/cascade), InsightFace (face embeddings), Tesseract OCR, faster-whisper STT, NLP, Pandas, NumPy

Integrations: SendGrid (transactional email), Mercado Pago, Redis/BullMQ, Webhooks (HMAC signed)

Infra & Security: Docker, NGINX, Debian/Linux, PM2, MFA/2FA, HMAC-SHA256, JWT, Helmet/CORS, Rate Limiting

PROFESSIONAL EXPERIENCE

Ocean Stack -- Full-Stack Developer / Software Engineer (Multi-tenant SaaS) - Dec 2025 - Jun 2026

Products: Niappa POS | Oceans HR (ATS) oceansstack.com

- Shipped **weekly product increments** in a structured delivery loop: **Figma** as source of truth, daily alignment with **CTO + PM**, iterative releases, and **UX/UI polishing** (Next.js, TypeScript, Tailwind).
- Implemented **tenant-safe isolation** and **role-based permissions** across modules so each business only sees and mutates its own data (**Supabase Postgres, RLS/Policies**).
- Delivered **operational back-office flows** (products, ingredients, stock, counts, suppliers) with **strong data consistency** guarantees via DB automation (**Postgres triggers, indexes, SQL/RPC**).
- Implemented **orders at scale: table sessions + split checks**, resilient **order lifecycle**, and safe **edit/void/restore** flows keeping stock accurate end-to-end (**RPC, transactional integrity, idempotent stock adjustments**).
- Built **reporting exports** for operations: **PDF/Excel** (sales + cash/audit), plus productivity-focused UI improvements (**i18n ES/EN**, search, sorting, confirmations).
- Built **Oceans HR ATS module** serving **hundreds of CVs/month per tenant: Kanban pipeline with drag-and-drop**, vacancy management, candidate profiles, recruitment funnel reports, **RBAC with company-level roles**, full **ES/EN i18n** (Next.js 16, React 19, TanStack Query v5, Zod v4, Supabase RLS).
- Engineered **AI-Powered CV Matching Engine: Gemini API with 3-model cascade fallback** for HA, **PDF text extraction, weighted scoring across 8 criteria, structured JSON output**, drag-and-drop upload UX and **automated candidate creation pipeline**.
- Implemented **SendGrid transactional email pipeline** triggered by **candidate pipeline phase changes** (automated and semi-automated flows): **templated emails per stage**, **Supabase triggers + queued dispatch**, **idempotency keys**, and **delivery audit log per tenant**.

Argentine Federal Penitentiary Service -- Full-Stack Developer / AI Engineer / Software Engineer - Jan 2024 - Present

SiGe2i internal platform (NestJS + Next.js + Python/FastAPI) - private, internal repos, no public links (federal confidentiality)

- Act as the **requirements-discovery point of contact**: survey staff/leadership needs, identify manual workflows worth automating with **AI**, scope the solution and ship it end-to-end the in-house equivalent of pre-sales/technical discovery.
- Deployed **"Movimientos de un Solo Mes"** on **AWS**: a password-gated internal platform (EC2 + RDS) for controlled, authenticated access to monthly movement records.
- Built and deployed a **public reports portal outside the VPN**, redundantly on **AWS and Azure**, so external/public-facing statistics stay isolated from the internal network while internal systems remain air-gapped.
- Shipped an **on-prem NL intelligence chatbot** over a **90+ table legacy database: SQL-RAG** (deterministic parameterized retrieval, **zero hallucinated facts**, zero data egress) + **grounded 100% local LLM** (Ollama/Qwen2.5, CPU-only, air-gapped) with **LLM structured-output NL parsing**, inline **[n] citations**, and **NDJSON token streaming**; cut a >45s legacy self-join to **sub-second**.
- Led delivery of a **multi-platform ecosystem** (internal ops + public verification portal) with **secure data flows** and controlled access for multiple stakeholders (React, Next.js, TypeScript, NestJS, Prisma).
- Built **Python Face Matcher service** in production: **InsightFace buffalo_L** (ONNX CPU), **512-d L2-normalized embeddings**, NumPy cosine search + argpartition top-K, per-UID centroid enrollment, MariaDB BLOB storage (**FastAPI**).
- Built an **AI-assisted document intelligence pipeline: OCR** (Tesseract LSTM spa+eng), **hybrid PDF extraction** (PyPDF2 + pdf2image/Poppler @ 300 DPI), and **ASR** (faster-whisper INT8 CPU), all with **human-in-the-loop review**.
- Migrated **~110 GB of legacy iBase8 data** to **MySQL/MariaDB** across **80+ modules** (tables, PDFs, scanned images, ZIPs, Word docs) via custom **ETL pipelines** with chunked streaming and checksum integrity.
- Automated **operational reporting** (PDF/Excel/Word) with charts and filters replacing manual workflows; engineered **secure document verification** (HMAC-SHA256, JWT, watermarking, anti-capture).
- Delivered **containerized infrastructure** (Docker, NGINX, PM2, Debian) for **170 concurrent users** with **MFA, CSRF**, rate limiting, Helmet/CORS, and automated backups; **Redis/BullMQ** async job queues with in-memory fallback for zero-downtime resilience.

VirtuaState -- Frontend Developer - May 2022 - Dec 2023

- Built a responsive marketing/portfolio site for a VR/AR studio with **SEO** and performance optimizations (HTML5, CSS3, JavaScript, mobile-first).
Live: <https://www.virtuastate.net/>

EDUCATION

Higher Degree in Programming - Teclab - Aug 2022 - Aug 2024

- Software fundamentals and delivery practices: databases, web development, UX, cloud basics, project management.

Full-Stack Web Development - CoderHouse - Jan 2022 - Mar 2023

- Delivered multiple end-to-end projects: frontend and backend foundations, web app architecture (HTML5, React, Node.js, MongoDB, Express, GraphQL).
