SUMMARY

Full-Stack Developer with 4+ years building multi-tenant SaaS products end-to-end. Core expertise in tenant isolation (Supabase RLS/Policies), POS/orders lifecycle, RBAC, AI document intelligence (OCR/NLP/STT), and security-first architecture (MFA, CSRF, HMAC/JWT). Daily stack: Next.js, React, TypeScript, Tailwind, Supabase/PostgreSQL, NestJS, Prisma. Experienced with Docker, NGINX, AWS, Terraform, and Python (FastAPI, Pandas). Mercado Pago API integration.

TECHNICAL SKILLS

Frontend: Next.js, React, TypeScript, Tailwind CSS, HTML5, CSS3, JavaScript, Zustand, TanStack Query, Zod, react-hook-form, @dnd-kit, ShadCN UI

Backend: NestJS, Node.js, Prisma, FastAPI (Python), Express, GraphQL

Databases: PostgreSQL (Supabase RLS, Triggers, RPC, Indexes), MySQL, MariaDB, MongoDB, SQL Server

DevOps & Infra: Docker, NGINX, Debian/Linux, AWS (EC2, RDS, S3, CloudFront), Terraform, Vercel, Git/GitHub

AI & Data: Gemini API (LLM cascade), Tesseract OCR, NLP, Speech-to-Text, Pandas, jsPDF, ExcelJS

Security: Auth0, MFA/2FA, CSRF, Helmet/CORS, HMAC-SHA256, JWT, Rate Limiting, Input Sanitization

PROFESSIONAL EXPERIENCE

Ocean Stack -- Full-Stack Developer (Multi-tenant SaaS) - Dec 2025 - Present

Products: [Niappa POS](#) | [Oceans HR \(ATS\)](#)

- Shipped weekly product increments in a structured delivery loop: Figma as source of truth, daily alignment with CTO + PM, iterative releases, and UX/UI polishing (Next.js, TypeScript, Tailwind).
- Implemented tenant-safe isolation and role-based permissions across modules so each business only sees and mutates its own data (Supabase Postgres, RLS/Policies).
- Delivered operational back-office flows (products, ingredients, stock, counts, suppliers) with strong data consistency guarantees via DB automation (Postgres triggers, indexes, SQL/RPC).
- Implemented orders at scale: table sessions + split checks, resilient order lifecycle, and safe edit/void/restore flows keeping stock accurate end-to-end (RPC, transactional integrity, idempotent stock adjustments).
- Built reporting exports for operations: PDF/Excel (sales + cash/audit), plus productivity-focused UI improvements (i18n ES/EN, search, sorting, confirmations).
- Built Oceans HR ATS module: Kanban pipeline with drag-and-drop, vacancy management, candidate profiles with notes/comments, recruitment funnel reports, RBAC with company-level roles, full ES/EN i18n (Next.js 16, React 19, TanStack Query v5, Zod v4, @dnd-kit, Supabase RLS).
- Engineered AI-Powered CV Matching Engine: LLM integration (Gemini API with 3-model cascade fallback for HA), PDF text extraction, weighted scoring across 8 criteria (skills, seniority, role, education, location, salary, language, industry), structured JSON output, and full frontend UX -- drag-and-drop upload, color-coded score cards, per-criteria progress bars, and automated candidate creation pipeline (Next.js App Router, Supabase RLS).

Argentine Federal Penitentiary Service -- Full-Stack Developer / AI Engineering - Jan 2024 - Present

Private repos

- Led delivery of a two-platform ecosystem (internal ops + public verification portal) with secure data flows and controlled access for multiple stakeholders (React, Next.js, TypeScript, Tailwind, NestJS, Prisma).
- Built an AI-assisted document intelligence pipeline: extract and summarize from scans/images/audio with human-in-the-loop review (Python, FastAPI, Tesseract OCR, NLP, Speech-to-Text).
- Automated operational reporting (PDF/Excel/Word) with charts, filters, and standardized formatting replacing manual workflows (TypeScript, Pandas).
- Engineered secure document verification: time-limited access, cryptographic validation, anti-exfiltration controls (HMAC-SHA256, JWT, watermarking).
- Implemented end-to-end security (MFA, CSRF, input sanitization, rate limiting, Helmet/CORS) and delivered containerized infrastructure with reverse proxying and automated backups (Docker, NGINX, Debian).
- Built secure integration layer: signed requests, idempotency, clock-skew validation, file integrity checks (SHA-256).
- Leveraged Redis for async job queues (audit logging, cross-service publishing, scheduled sync) with BullMQ, plus server-side caching with automatic in-memory fallback for zero-downtime resilience.

VirtuaState -- Frontend Developer - May 2022 - Dec 2023

- Built a responsive marketing/portfolio site for a VR/AR studio with SEO and performance optimizations (HTML5, CSS3, JavaScript, mobile-first). Live: virtuastate.net

EDUCATION

Higher Degree in Programming - Teclab - Aug 2022 - Aug 2024

- Software fundamentals and delivery practices: databases, web development, UX, cloud basics, project management.

Full-Stack Web Development - CoderHouse - Jan 2022 - Mar 2023

- Delivered multiple end-to-end projects: frontend and backend foundations, web app architecture (HTML5, EJS, CSS/SASS, React, Node.js, MongoDB, Express, GraphQL). [Live project](#)
