SUMMARY

Full-Stack Developer with 4+ years shipping multi-tenant SaaS products end-to-end, with strong focus on **AI integration**. Built an **AI-powered CV Matching Engine using Google Gemini API** (3-model LLM cascade) and a **Python AI document-intelligence pipeline** (Tesseract OCR, NLP, Speech-to-Text) replacing manual workflows. Core expertise: tenant isolation (Supabase RLS), POS/orders lifecycle, RBAC, and security-first architecture (MFA, CSRF, HMAC/JWT). Daily stack: Next.js, React, TypeScript, Tailwind, Supabase/PostgreSQL, NestJS, Prisma, Python (FastAPI, Pandas), Docker, NGINX, AWS, Terraform. Mercado Pago integration.

TECHNICAL SKILLS

AI & Data: Google Gemini API (LLM cascade fallback), Tesseract OCR, NLP, Speech-to-Text, PDF text extraction, weighted scoring, Pandas, Python ETL, jsPDF, ExcelJS

Frontend: Next.js 16, React 19, TypeScript, Tailwind CSS, HTML5, CSS3, JavaScript, Zustand, TanStack Query v5, Zod v4, react-hook-form, @dnd-kit, ShadCN UI

Backend: NestJS, Node.js, Prisma, FastAPI (Python), Express, GraphQL

Databases: PostgreSQL (Supabase RLS, Triggers, RPC, Indexes), MySQL, MariaDB, MongoDB, SQL Server, Redis (BullMQ)

DevOps & Infra: Docker, NGINX, Debian/Linux, AWS (EC2, RDS, S3, CloudFront), Terraform, Vercel, Git/GitHub, CI/CD

Security: Auth0, MFA/2FA, CSRF, Helmet/CORS, HMAC-SHA256, JWT, Rate Limiting, Input Sanitization, Watermarking

PROFESSIONAL EXPERIENCE

Ocean Stack - Full-Stack Developer (Multi-tenant SaaS) - Dec 2025 - Present

Niappa POS (Multi-tenant Restaurant Platform) - <https://niappa-restaurant.vercel.app>

- Implemented tenant-safe isolation and role-based permissions across modules so each business only sees and mutates its own data (Supabase Postgres, RLS/Policies).
- Delivered operational back-office flows (products, ingredients, stock, counts, suppliers) with strong consistency via DB automation (Postgres triggers, indexes, SQL/RPC).
- Implemented orders at scale: table sessions + split checks, resilient order lifecycle, edit/void/restore flows keeping stock accurate end-to-end (RPC, idempotent stock adjustments). Mercado Pago integration.
- Built reporting exports (PDF/Excel sales + cash audit) and productivity UI (i18n ES/EN, search, sorting, confirmations).

Oceans HR (ATS) with AI CV Matching Engine - <https://oceans-hr.vercel.app>

- **AI-Powered CV Matching Engine:** integrated **Google Gemini API with 3-model cascade fallback for HA**, PDF text extraction, weighted scoring across 8 criteria (skills, seniority, role, education, location, salary, language, industry), structured JSON output, and automated candidate creation pipeline.
- Frontend UX: drag-and-drop CV upload, color-coded score cards, per-criteria progress bars (Next.js App Router, Supabase RLS).
- Built ATS module: Kanban pipeline with drag-and-drop, vacancy management, candidate profiles with notes, recruitment funnel reports, RBAC with company-level roles, full ES/EN i18n (Next.js 16, React 19, TanStack Query v5, Zod v4, @dnd-kit, Supabase RLS).
- Shipped weekly increments in structured delivery loop: Figma as source of truth, daily alignment with CTO + PM, iterative releases, UX/UI polishing.

Argentine Federal Penitentiary Service - Full-Stack Developer / AI Engineer - Jan 2024 - Present

Private repos | Two-platform ecosystem: internal ops + public verification portal

- **AI Document Intelligence Pipeline (Python):** built end-to-end pipeline that extracts and summarizes content from scans, images and audio with human-in-the-loop review. Stack: **Python, FastAPI, Tesseract OCR, NLP, Speech-to-Text**. Replaced hours of manual transcription per day.
- **Automated Operational Reporting:** generates PDF/Excel/Word reports with charts, filters and standardized formatting using **TypeScript and Pandas**, replacing manual spreadsheet workflows.
- **Secure Document Verification:** engineered time-limited access, cryptographic validation, anti-exfiltration controls (HMAC-SHA256, JWT, watermarking) for public verification portal.
- Implemented end-to-end security (MFA, CSRF, input sanitization, rate limiting, Helmet/CORS) and containerized infrastructure with reverse proxying and automated backups (Docker, NGINX, Debian).
- Built secure integration layer: signed requests, idempotency, clock-skew validation, file integrity checks (SHA-256).
- Leveraged Redis async job queues (audit logging, cross-service publishing, scheduled sync) with BullMQ + server-side caching with in-memory fallback for zero-downtime resilience.
- Led delivery of two-platform ecosystem with secure data flows and controlled access for multiple stakeholders (React, Next.js, TypeScript, Tailwind, NestJS, Prisma).

VirtuaState - Frontend Developer - May 2022 - Dec 2023

- Built responsive marketing site for VR/AR studio with SEO and performance optimizations (HTML5, CSS3, JavaScript, mobile-first). Live: <https://www.virtuastate.net>

EDUCATION

Higher Degree in Programming - Teclab - Aug 2022 - Aug 2024

- Software fundamentals and delivery practices: databases, web development, UX, cloud basics, project management.

Full-Stack Web Development - CoderHouse - Jan 2022 - Mar 2023

- End-to-end projects: frontend/backend foundations, web app architecture (HTML5, EJS, CSS/SASS, React, Node.js, MongoDB, Express, GraphQL). Live: <https://react-e-commerce-j-sanso.vercel.app>
